PROFESSIONAL SUMMARY

- Software Engineering graduate (COMSATS University Islamabad, CGPA 3.88/4.00, ranked 2nd in the Batch of 2026) with hands-on experience across 8+ full-stack and AI/ML projects, seeking an entry-level Software Engineer role — with additional specialization in full-stack development and applied AI/ML.
- Builds AI-integrated systems end-to-end — dataset preparation, model fine-tuning, and production deployment — including an AI-driven e-commerce platform, a fake news classifier (98.69% accuracy), and an AI resume analyzer with a full CI/CD pipeline.
- Proficient across the stack: Python, FastAPI, React.js/Next.js, Node.js, Java, C++; comfortable owning a project from design through cloud deployment (Docker, GitHub Actions, Railway, Netlify, Firebase). Self-directed study of prompt engineering and local LLM deployment (Ollama, Open WebUI); uses AI tools deliberately — prompting, debugging, refactoring — to move faster while owning code quality.

EDUCATION

BS Software Engineering — COMSATS University Islamabad, Attock Campus

CGPA: 3.88/4.00 | Graduated July 2026

- Relevant Coursework: Data Structures & Algorithms, OOP, Software Design & Architecture, Operating Systems, Machine Learning, Pattern Recognition, Information Security, Human-Computer Interaction, Software Project Management

ACADEMIC HONORS & AWARDS

- Ranked 2nd in BS Software Engineering, Batch of 2026, COMSATS University Islamabad — Silver Medal
- Prime Minister's Laptop Scheme recipient (2023)
- Benevolent Fund Scholarship recipient
- FBISE Ambassador — promoted SLO-based examination reforms (2022)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, C#, C++, HTML/CSS
- **Frameworks & Libraries:** FastAPI, React.js, Next.js, React Native, Node.js, Windows Forms, Tailwind CSS
- **AI/ML:** scikit-learn, pandas, TensorFlow, Groq API, DeBERTa-v3, Llama-3-8B, vLLM, Ollama, Open WebUI
- **Tools & Platforms:** Version Control (Git/GitHub), Docker, GitHub Actions, Firebase, Netlify, Streamlit, Figma, VS Code, Visual Studio
- **Methodologies:** Agile/Scrum, SDLC, Unit Testing
- **Soft Skills:** Team Leadership, Cross-functional Collaboration, Technical Presentation, Problem-Solving, Adaptability

PROJECT EXPERIENCE — SOFTWARE ENGINEERING

Intelligent AI E-Commerce Platform (Final Year Project) | Python, FastAPI, React.js, Firebase, DeBERTa-v3, Llama-3-8B (vLLM)

- Led a 3-person team; built the frontend and designed the database architecture, integrating a REST API layer for live marketplace data.
- Gathered and prepared the training dataset, then fine-tuned a DeBERTa-v3 model to detect fake reviews with 90%+ accuracy, alongside a teammate's Llama-3-8B/vLLM integration for AI-generated product insights.

CRGP-funded research:

- Contributing to a CUI Research Grant Program (CRGP)-funded research project investigating trustworthy AI techniques for fake review detection and aspect-based review summarization in e-commerce.

ResumeLens — AI Resume Analyzer | Node.js (Netlify Functions), Groq API (Llama 3.1), Docker, GitHub Actions

- Built and deployed an AI-powered resume analyzer with section-by-section scoring, AI bullet-rewrite suggestions, and a live highlighted-diff preview.
- Refactored into a modular multi-feature architecture; containerized the backend and shipped a full CI/CD pipeline (Docker, GitHub Actions, GHCR) to Railway, verified working end-to-end.

Food Ordering System Re-Engineering | C++, OOP, SOLID Principles

- Refactored a legacy C codebase to modern C++ (STL containers, modular OOP, dependency injection), fixing single-responsibility violations, memory leaks, and input vulnerabilities.

PROJECT EXPERIENCE — AI/ML

Fake News Detector | Python, scikit-learn, pandas, Streamlit

- Built and deployed a classifier (TF-IDF + Logistic Regression) achieving 98.69% accuracy on the ISOT dataset (44,898 articles); identified and resolved a data leakage risk during feature selection.

Image Captioning System | Python, TensorFlow

- Developed an image-captioning system trained on Flickr8k dataset (~8,000 images) to generate descriptive captions of input images.

CERTIFICATIONS & EXTRACURRICULARS

- AI and Machine Learning Workshop — Codanics (Online Instructor-Led), 2024
- Independently benchmarks open-source LLMs (Phi-4-mini, Qwen3.5) and LLM APIs (Groq/Llama 3.1) for offline, local deployment on personal hardware (Ollama, Open WebUI)
- Languages: English (Fluent), Urdu (Native), Hindi, Punjabi
